Awards Programs

Heritage Landscapes of San Anselmo was recently given a safety achievement award from the National Association of Green Industry Professionals.

The firm, which has been creating customized landscapes for more than three decades, was awarded an overall safety achievement award by the Professional Landcare Network this week at the association's green industry conference awards banquet in Kentucky.

The company was selected for its high-performing safety program and safe work environment, according to the association.

Jan Gross, owner of the firm, said "safe work environments show our employees and clients that we care. We will continue to promote safe work habits by our employees on a daily basis because we recognize the importance of safety in the workplace."
